# HOW TO GET COOKIE

Go to SportUni site

[SportUni | Tampereen korkeakouluyhteisö](#)
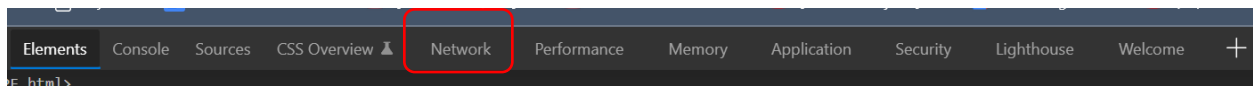

Change language to English (I don't know Finnish)

Inspect the page
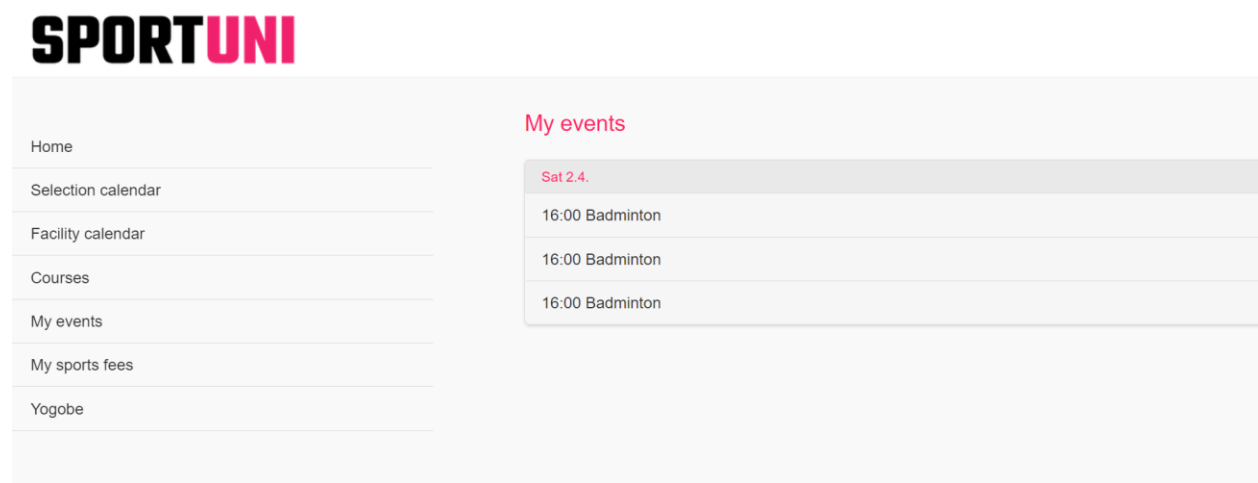

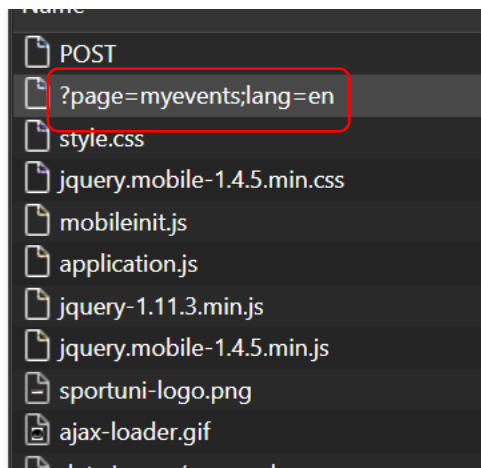

Choose network tab

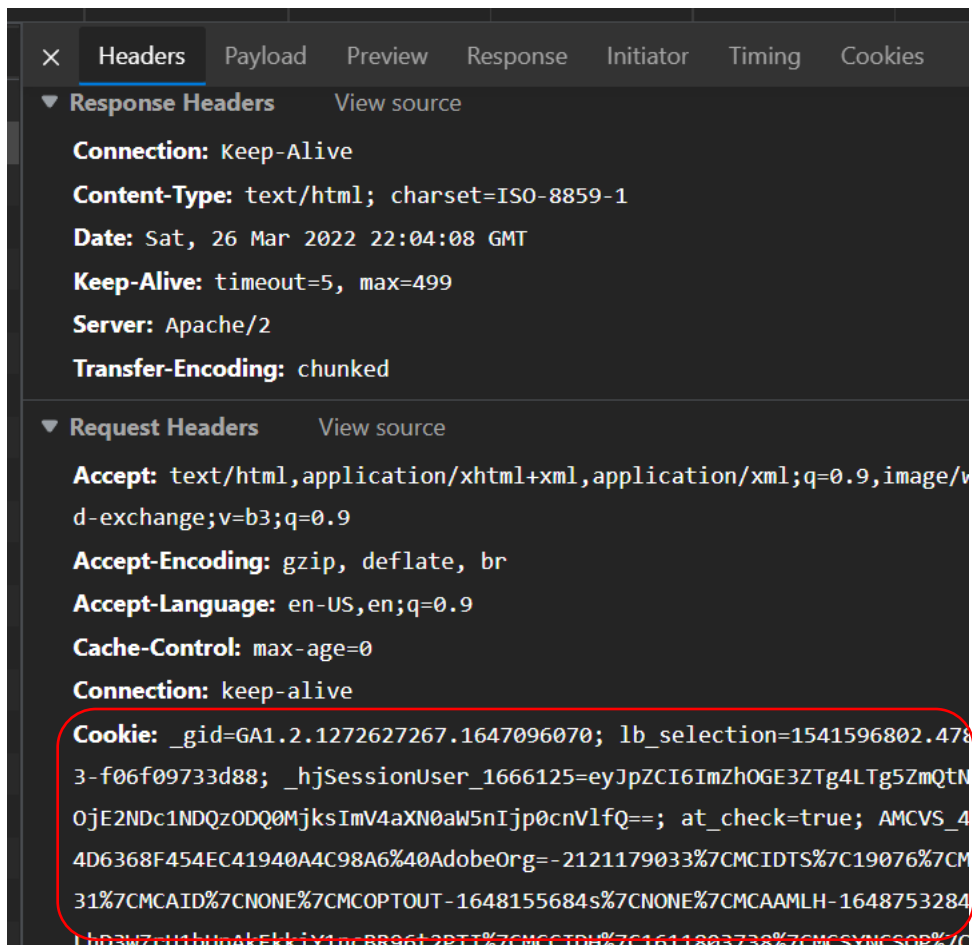

Click My Page

Login with Tuni credentials

In network tab, look for this request

In the Headers tab, you will see the Cookie: abcxyz

You don't have to give a shit what it is, just copy everything after
"Cookie: " then place it here in index.js file

```
const cookie = '';
```

TIP: If you are truly IT guys, you should place the copied cookie in the ''
because it is a string.
